Sundown Products has been manufacturing and supplying high quality poultry litter to commercial chicken and turkey units, and game farms, for over 20 years.

Sustainability

We use 100% British straw in our poultry litter products, and work to reduce our carbon footprint by baling some of our straw locally to our production plant. Our bale and bag packaging uses recycled content and is itself recyclable.

Innovation

Our ongoing programme of research and development, and investment in new technology, has enabled us to continually improve our products, ensuring they meet the needs of today's professional poultry producers.

Added value

Used Pellebed and chopped-straw poultry litter is of more value to Anaerobic Digestion plants than wood based products due to its optimal gas yield qualities.

Dust extraction

Through our R&D programme we have developed a unique processing method that de-dusts each bale of chopped straw poultry litter not once, but twice, helping to minimise dust levels within poultry houses.

Unique pellet litter

Our specialist straw pelleting technique has been developed to create a looser crumble texture which covers the floor better than wood pellets, and breaks down faster to provide a soft and supportive bedding environment, while still offering exceptional absorbency qualities.

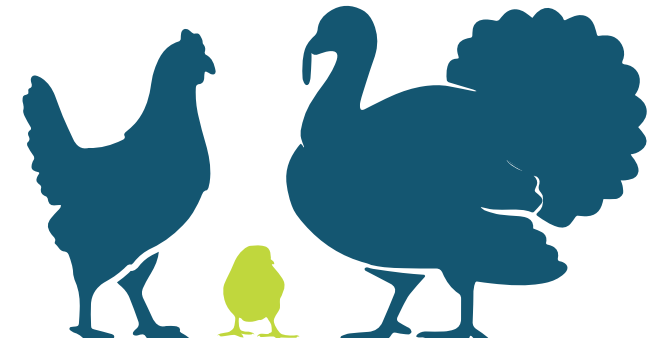

Delivery

Bulk Pellebed litter can be delivered in our own lorries and blown into poultry sheds, providing a more biosecure option. The product can then be spread using commonly-used machinery. Bagged Pellebed is also available by the pallet.

Baled chopped straw products are delivered on lorries equipped with mounted forklift trucks that can off-load from one side.

Chopped Straw

Chopped wheat straw poultry litter for free range and barn-reared broilers and turkeys.

- ✓ Best quality British wheat straw
- ✓ Suitable for day-old to fully grown
- ✓ Good insulation properties
- ✓ Chopped and double de-dusted
- ✓ Treated to prevent mould and spore growth
- ✓ Easy to spread and top-up
- ✓ Enrichment and play bales

NEW Chop lengths

New for 2024, two chop lengths of straw available.

Fine chop

suitable for lighter birds

Standard chop

suitable for heavier birds

Enrichment and play bales

Available in both chop lengths

Pellebed

Specialist straw crumble litter for broilers.

Excellent absorbency with low dust and low micro counts. The crumble texture encourages natural dust-bathing behaviour and improves bird welfare.

Now with added straw shreds for improved floor coverage and consistent temperature for chicks.

- ✓ Rapidly absorbs ammonia
- ✓ Helps to reduce pododermatitis
- ✓ Improved foot and hock health
- ✓ Rarely needs topping-up
- ✓ Compost quickly
- ✓ Biosecure bulk delivery available
- ✓ Suitable for day-old to fully grown
